Hands-on Exercise No. 3 (Solution)
DigiSkills 2.0 Batch-07
Data Analytics & Business Intelligence

Total Marks: 10

Problem Statement

Power BI offers a powerful combination of visuals to effectively communicate data insights. Cards provide a quick and clear way to display key metrics. Multi-row cards take this a step further by showcasing multiple measures within a single card, ideal for comparing different values. When it comes to visualizing how a whole is composed, donut charts shine.

Tasks:

1. You are required to download the dataset from the following link:
https://lms.digiskills.pk/Courses/DBI101/Downloads/Bike_Sales_Sort_Dataset.csv and open the downloaded sample CSV file Bike Sales_Sort_Dataset.csv in PowerBI.
2. You are required to create a card in Power BI to monitor what is the total sum of profit across all states. (Provide screenshot)
3. Create a multi row card where you will show the SUM of Revenue, Unit cost and Unit price.
(Provide Screenshot)
4. Create a donut chart in which you show the profit by state. (Provide Screenshot)

Requirements:

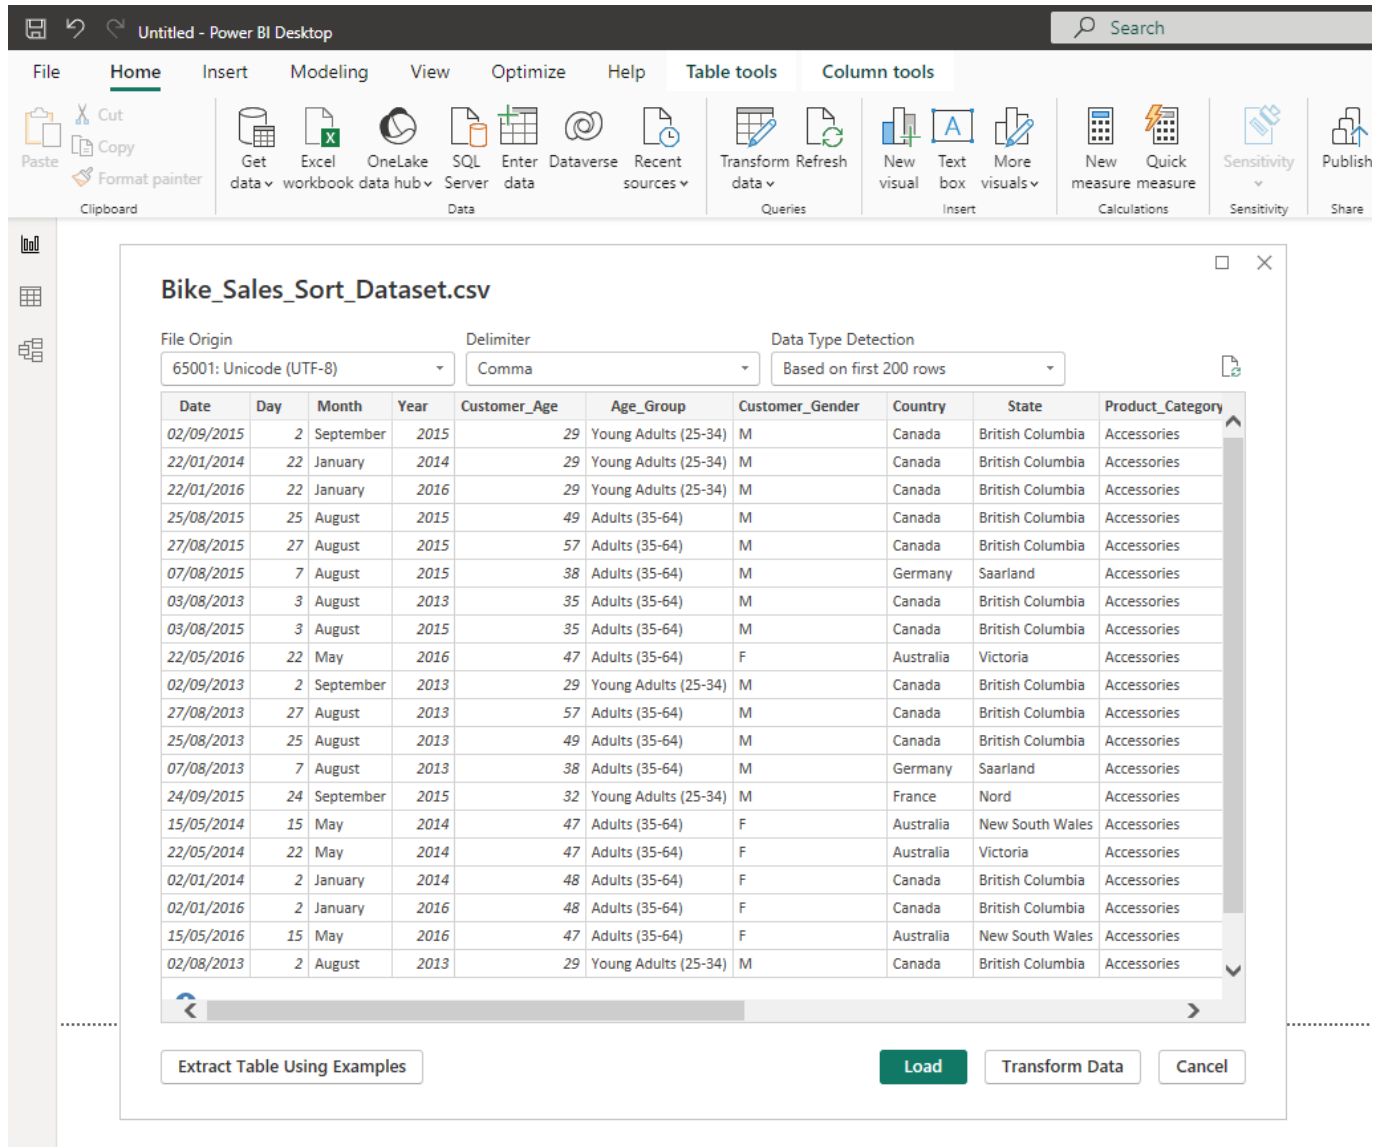

In this exercise you are required to perform all the given tasks and provide

- Screenshots of Task 2, 3, 4.
- Submit the completed tasks in word document.

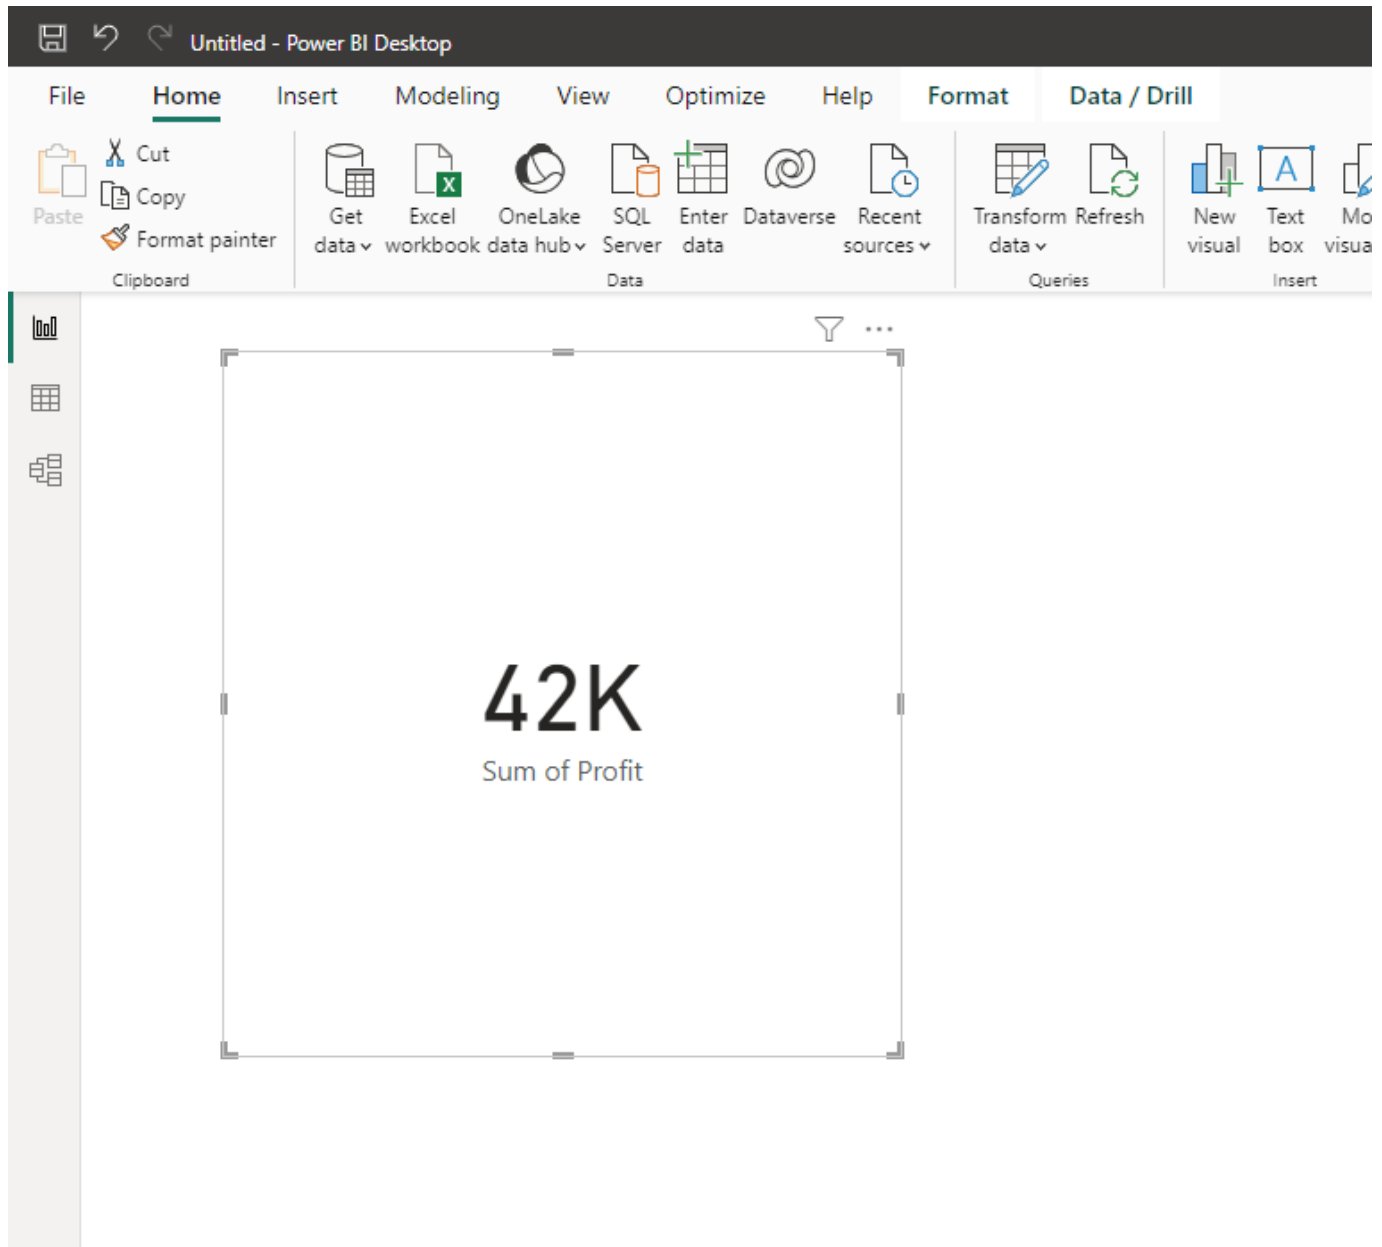

BEST OF LUCK ☺

1. You are required to download the dataset from the following link:

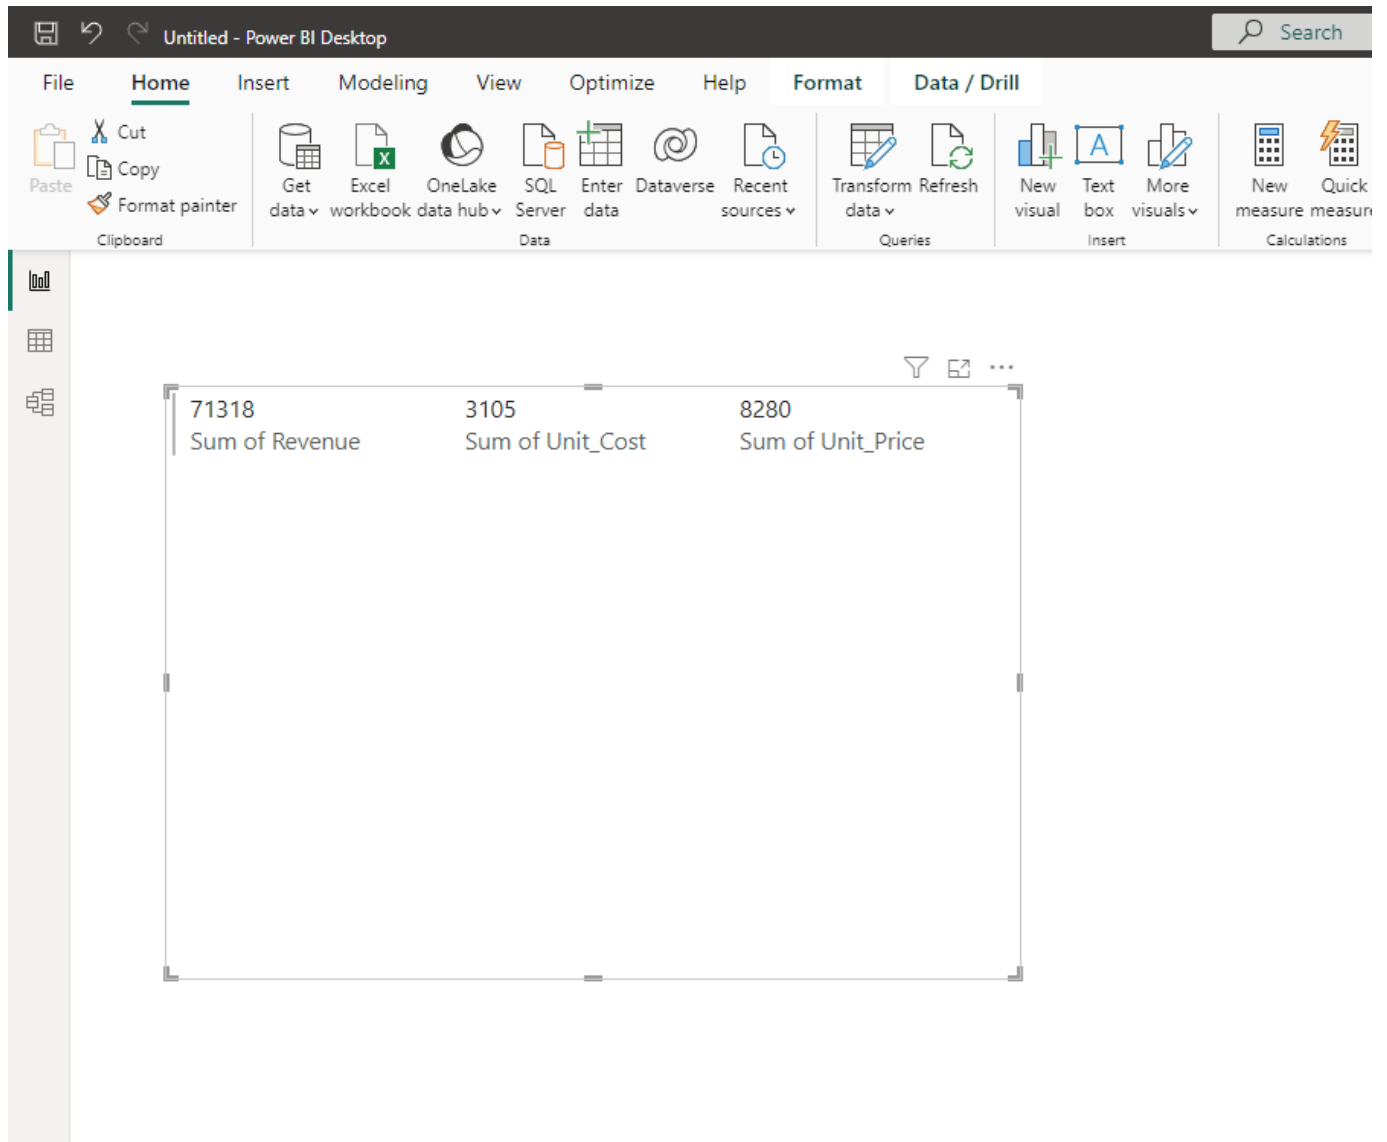

https://lms.digiskills.pk/Courses/DBI101/Downloads/Bike_Sales_Sort_Dataset.csv and upload the downloaded CSV file Bike_Sales_Sort_Dataset.csv in PowerBI. (Provide a screenshot)

- 2) You are required to create a card in Power BI to monitor what is the total sum of profit across all states. (Provide screenshot)

- 3) Create a multi row card where you will show the SUM of Revenue, Unit cost and Unit price. (Provide Screenshot)

4) Create a donut chart in which you show the profit by state. (Provide Screenshot)

How to submit solution file on LMS?

Please perform the following steps for submitting your solution using LMS:

- 1) Login to the LMS
- 2) Click on the **Exercises** button within the **My Activities** section

- 3) Click on the submit button to upload your Solution.

- 4) Keep in mind to upload your Solution in .doc or .docx format
